

Test Problem

PROBLEM:

This is a test problem mainly just to test the submission system out. Given a list of strings as input, output the same list of strings in the same order except capitalize every character.

INPUT:

The first line of input will consist of an integer x representing the number of strings that follow. On the following x lines will be one string per line which you need to read in.

OUTPUT:

For each of the x strings, print a line that is the same string but capitalized. Do not modify the order of the strings.

EXAMPLE INPUT:

3

Hi

There

Sir

EXAMPLE OUTPUT:

HI

THERE

SIR
